

# SHORE MATE®

**FIRST BY DESIGN**

## **BOAT LIFTS & DOCKS**

Re-Programming Instructions  
Remote Control f/Hydraulic Lifts (LSAH020)

*To re-code an existing Transmitter*

### **NOTE**

**Locate the program switch under the access panel on the front of the Hatch-it module as shown above.**

**Please read through the steps before you begin. You have 10 seconds to complete the program sequence.**

### ***Steps - "Learn" Routine***

- 1) Push the program switch (SW1) until the red program LED light is solid, then release.
- 2) Push button CH#1 on the remote until the program LED light goes out...now release button CH#1.
- 3) Push button CH#1 again, the program LED should flash slowly...now release button CH#1.
- 4) Your new remote is now programmed.

NOTE: If the new remote does not work, make sure that the indicator LED light on the remote is flashing and that the battery is good. Then repeat steps 1 through 4.
