BOAT LIFTS & DOCKS

Off Season Storage Recommendations

Lower the hoist. If equipped, close the needle valve on each hose and disconnect from the pump.

- 1) Connect the hoses together. This will protect the fittings from contamination.

Place hoses so that the fittings are as protected as possible.

- 2) If possible, roll hoses up and place in a trash bag to protect the hoses from the sun.
- 3) Store the pump box in a cool, dry location.
